Address: Kala Patha, near kali chattan Betul., 460001 BETUL (India)

Website: <http://rdpsbetul.org/>

## **Graduation** **JH GOVT PG COLLEGE**

Address: civil lines, Betul., 460001 BETUL (India)

## **PROJECTS**

---

### **SECONDMEDIC**

Second Medic is a medical second opinion service that brings the best, brightest and most talented doctors who have trained in the most prestigious medical institutes across the world and bring the benefits of their expertise to the people of India.

In the project, we aim to provide access to a world-class medical second opinion to people who are worried about their health and want to be sure that they are receiving the right treatment for the right diagnosis. Technology: Android, IOS, and PHP

Roles & Responsibility: –

1. Writing and executing test cases
2. Issue reporting and issue dashboard creation
3. Understand and implement client requirements and explain them to the development team
4. Day-to-day reporting of activities to manager and client
5. Captured and tested all modifications to proposed functional requirements.
6. Met all project timelines and deadlines.
7. Assisted clients and team in producing high-quality applications

### **Donation Domain Dashboard**

In this project, any person can donate any amount for donations categories in Muslim communities have as Zakat, Harta, Fitrah & Fidyah. Users can use POS installed in Masjids and donate using web applications using credit/Debit Cards. Amils and Payers can see the amount they have donated and the total donations they have paid or received under different categories. Also, users can Raise a Refund of the amount of the donation he/she has paid. And supervisor and Amil can process the further application through the website and accept or reject the refund raise application.

Roles and Responsibilities in this project :

1. Conducted user acceptance testing to ensure that developed systems satisfied the needs of business clients as specified in the functional requirements.
2. Designed, developed, and implemented user acceptance testing protocols as the final phase of application development.
3. Captured and tested all modifications to proposed functional requirements.
4. Met all project timelines and deadlines.
5. Assisted clients and teams in producing high-quality applications.

### **ChatBot Mobile Application**

In this project, users can send and receive messages using WhatsApp from the business by saving the contact information of the various business which have this chatbot developed. The user sends the desired input and gets the output based on the requirements. Workflow is given for the chatbot application and the user needs to check whether he is receiving valid output and gets validations in case of invalid inputs.

## Roles and Responsibilities in this project :

1. Conducted user acceptance testing to ensure that developed systems satisfied the needs of business clients as specified in the functional requirements.
2. Designed, developed, and implemented user acceptance testing protocols as the final phase of application development.
3. Captured and tested all modifications to proposed functional requirements.
4. Met all project timelines and deadlines.
5. Assisted clients and team in producing high-quality applications.

## Online Driving Learning Platform

Platform is a comprehensive mobile application and a website with several panels that manage the booking and wallet and commission system that helps individuals, from beginners to advanced drivers, learn and practice safe driving skills, rules of the road, and prepare for their driver's license exams. The app provides a user-friendly and interactive learning experience, ensuring that users become confident and responsible drivers.

## Credit Monitoring

Credit Monitoring platform is an extensive mobile application that empowers users to monitor their credit scores, track financial activities, and protect themselves against identity theft and fraud. The app offers real-time insights into credit status and financial habits, ensuring users maintain healthy credit profiles. By developing a credit monitoring app, you help users take control of their financial well-being, make informed decisions, and maintain healthy credit profiles.

## Dating and Eating App

Dating & Eating is a unique mobile application that brings together individuals who share a passion for food and dining. The app provides a platform for users to meet new people, explore culinary delights, and enjoy meaningful conversations in a restaurant setting. It's a perfect blend of dating and dining experiences. It encourages social interactions, culinary exploration, and the formation of genuine connections over shared dining experiences. user can login with their interest and also choose the preferences they want. user will get the profile with their preferences and can match.

## ORGANISATIONAL SKILLS

---

### MANUAL TESTING

### SYSTEM TESTING

### TEST CASE CREATION/EXECUTION

### BVA & ECP

### FUNCTIONAL, REGRESSION, SYSTEM, SMOKE, & BLACK BOX TESTING.

### MOBILE APPLICATION TESTING ON BOTH ANDROID AND IOS DEVICES

## RESPONSIBILITIES

---

- 
- Analyzed the Business Requirements document and have written Test Cases.
- Preparing Test Scenarios and Test plans, Understanding documents with Business Requirements, design documents as inputs.
- Analyzed and provided proper estimates of the Business Requirements.
- Provide a daily/weekly project report that includes status reports.
- Ensure traceability of test cases back to Business requirements.
- Involved in Functional, Regression, and User Acceptance Testing.
- Analyzing the Test Cases prepared by other team members.

- Preparing Suggestion Documents to improve the quality of the application.
- Worked with cross-functional teams to ensure quality throughout the software development lifecycle

## **FUNCTIONAL**

---

### **Experience and Skills**

- Manual testing of web-based applications and mobile apps as well (iOS and Android).
- Functional testing, Regression testing, Database testing, and Data integrity & Business rule conformance.
- Experience in writing Test Plans, Defining Test Cases and interacting with developers in fixing errors.
- Ability to work in a team environment or independently.
- Good Experience in Software Development Life Cycle (SDLC) and basic concepts of development
- Well-versed with concepts of STLC and Defect Life Cycle
- Good Experience in Test Execution.
- Manual test case preparation

## **STRENGTHS**

---

### **Time-management**

Able to divide my time in the most optimal way possible.

### **Life-long Learner**

Never done learning and always seeking to improve me. Curious about new possibilities and taking action to explore them.

### **Interpersonal Skills**

Aware of the social expectations of the working place and team interaction dynamics.
